KESSEL AG

Style that works.

The fact that we are stylish is confirmed by numerous design prizes. That is nice. The fact that our products work outstandingly well is confirmed daily by our customers. That is important.

Which is why we give our all day in, day out, for your satisfaction. By only using the best materials. By offering accessories for a whole range of different requirements. And by relying consistently on the highest production standards.

High-quality materials. The delight at a newly designed bathroom should be more than short-term. Which is why we do not compromise as far as material selection is concerned. Whether classical stainless steel or innovative compound material is involved: with our high-quality materials we guarantee the maximum possible durability and safety for our bathroom drains.

Sensible accessories. Typical for KESSEL: like all our products, our bathroom drains are not only pretty to look at, they are extremely versatile too. In our comprehensive range of accessories you will find the right answer to all the challenges your application presents to our drains.

Global presence. Outstanding quality. KESSEL drainage solutions are coveted all over the world – more than 50 export markets speak for themselves. Our global success is thanks to the quality mark "Made in Germany" to a large extent: our bathroom drains are manufactured exclusively at our main production plant in Lenting near Ingolstadt.

Wall drain Scada 🗕

ST.

Clear edge. Wall drains

Take a firm line: the design prize-winning wall drain *Scada* is a real "eye-catcher" that gives bathrooms a quite exclusive look. Rather than being in the floor, this compact drain is set into the wall, thus creating the pre-requisites for a 100 % floor-level and freely accessible shower. There is a choice of four high-grade drain covers available for *Scada* – even including versions with LED lighting!

Scada LED

Only from KESSEL: LED lighting with automatic colour-changing program or individual selection of light colour.

Clear advantage. Features of our wall drains

Connections on three sides

Thanks to different connection options (front, lateral left or right) there is no room-side twisting of the drain pipe necessary and the installation of underfloor heating underneath the shower is no problem.

Height-adjustable installation supports

The height-adjustable installation supports of the dry-walling version allow convenient adjustment of the overall installation height from 80 to 215 mm up to the top edge of the tile.

Clear decision. Wall drains range

The Scada is available with four different stainless steel drain covers. If necessary, the wall drain can also be pre-assembled and delivered sealed in an installation board. All versions offer a flow rate of 0.5 l/s.

Scada drain covers

Invisible 296 × 61 mm (W × H, tileable) for floor tiles up to 10 mm.

Stainless steel 312 × 74 mm (W × H) for floor tiles up to 17 mm.

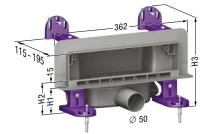

Wave 312 × 74 mm (W × H) for floor tiles up to 10 mm. 1

Stainless steel 312 × 67 mm (W × H) for floor tiles up to 10 mm.

Good point. Bathroom drains

As far as classical drainage is concerned, our varied range of bathroom drains leaves nothing to be desired. No matter whether the bathroom project is in a new building, involves conversion or refurbishment work: the sophisticated functions and numerous combination options made possible by the modular principle make our bathroom drains suitable for almost all applications – and the different design covers made of stainless steel guarantee their stylish appearance.

4.4

Variable upper sections

Extremely flexible: our rotatable, tiltable and height-adjustable upper sections. The shallow bed upper section *Variofix* also permits the cover to be moved and thus adapted to the tile pattern.

Good thinking.

Features of our bathroom drains

Low installation depth

Our low-profile bathroom drains *The Superflat* and *The Ultraflat* are particularly suitable for renovation projects thanks to their low installation depths.

Convenient cleaning and maintenance

The locking and removal device *Lock & Lift* makes inserting and locking or unlocking and removing the cover ultra fast. This saves time during mandatory daily cleaning in the commercial sector.

Good choice. Bathroom drains range

Covers

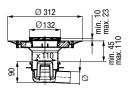

Choose from different design covers made of stainless steel and the tileable variant Invisible in order to design our bathroom drains to your own taste.

Oval Kessel Slot Invisible Spot

The *Classic* model is the all-rounder among our bathroom drains. Its compact size, lateral or vertical outlet and various installation options make it particularly versatile. The flow rate is 0.8 l/s.

Beautiful line. Shower channels

Good design is timeless – our shower channels *Linearis* are certainly no exception to this. Their reduced design and high-quality stainless steel make them an optical highlight that you will never tire of seeing. And even if you do, the shower channels can simply be redesigned for a new look thanks to their turnable and tileable stainless steel cover. No matter what: with *Linearis* roomside or near to the wall there are quite literally no limits to barrier-free shower convenience.

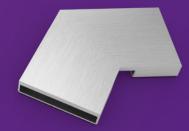

Easily extendable

Multiple *Linearis Infinity* shower channels can be connected together with the available extension sections to provide the exact channel length of choice. Corners are also possible with the 30°-, 45°- und 90° connection angles.

KESSEL AG

Beautifully practical.

Features of our shower channels

Color selection

Linearis Infinity channels are available in the classic stainless steel matt or polished surface finish as well as the new colored surfaces of matt Copper, Bronze or Black.

Hygenic concept

The new *Megastop* waterless odor trap offers a unique and hygenic solution to standard odor traps. Thanks to the easily removable channel covers which provide full access for cleaning and maintenance.

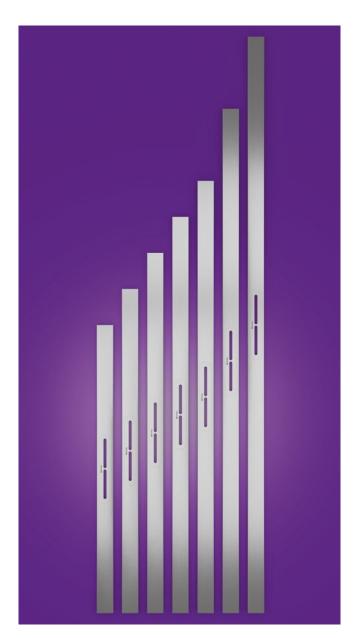

Individual design

The reversible and tileable stainless steel cover allows the *Linearis Compact* an *Linearis Comfort* shower channel to be contrasted with the floor as an eye-catcher or integrated as discretely as possible.

various installation heights

The installation heights of the shower channels start at 60mm (*Linearis Infinity*) and can meet exact height requirements with the vertically adjustable installation supports.

Multiple channel lengths

All shower channels are available in mulitple lengths. For custom installation lengths, the *Linearis Infinity* can be shortened to meet the exact required length.

Beautifully versatile.

Shower channels range

Linearis Infinity 60

The narrow Linearis Infinity channel for walk-in showers is suitable for indoor linear drainage for household and commercial use. The channel profile made of AISI 316 stainless steel can be individually shortened and can be extended straight or at three (30, 45 and 90 degree) angles.

The drain body made of PP is equipped with sound and settlement absorbers. The channel contains a clip-on flange with factorymounted waterproofing membrane according to EN 1253-1 and DIN 18534-1-W3-I. The channel profile can be pushed in the lengthwise and transverse direction in the clip-on flange to level out construction tolerance. Open seepage water openings, without flooding of the waterproofing level in the event of backwater.

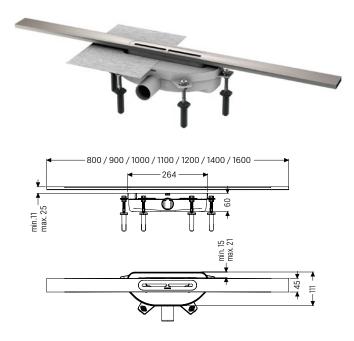

With Odour trap with sealing water height of 24 mm or including Megastop mechanical odour trap with water seal.

System 100

Linearis Compact

Our shower channel *Linearis Compact* with non-mounted waterproofing membrane is a dream for all those who value puristic, timeless design in the bathroom. Its compact height also makes it suitable for renovation work and a flow rate of 0.6 l/s / 0.5 l/s with 10 mm / 0 mm water head.

Linearis Compact Modular design

The *Linearis Compact* with non-mounted waterproofing membrane can also be delivered as an upper section that can be combined with all drain bodies and accessory parts of the modular system 100.

This is **KESSEL**.

Since 1963, KESSEL has stood like no other company for innovative and reliable drainage technology. We have established ourselves as the impulse generator in the industry and are now a worldwide premium supplier.

During the production of our products as well as their operation on-site, we keep quality assurance, environmental protection and worker's safety at the top of our list.

We also place great value in the relationship with our customer, providing consultation, installation support, commissioning and after-sales service.

One thing is certain, our innovation, quality, reliability and service is number one in the industry.
